Order Items

There is an option to have additional substrates produced, but these must be ordered in advance. For it to make sense for us to produce a substrate, we need to be able to produce it in a certain quantity, therefore there are minimum order requirements for the number of units or volume you can order.

Please order as early as possible. After ordering, the substrate can be expected to be ready for pickup within 2-3 working days.

Orders are placed by sending an email to: substrate-order@sund.ku.dk

Special Agreements

Special agreements include substrates and buffers where the customer contributes various media or chemicals to the mixture, which SSC does not normally have in stock.

It is always possible to contact us regarding the production of a buffer or substrate that is not listed, but this requires regular purchases of it in relatively large quantities.

Washing and sterilization

The following are prices for washing and autoclaving of goods performed by SterilCentralen. Some large items that take up a lot of space in the washers might be charged as more than 1 unit.

Smaller utensils that can be pooled in baskets are not charged individually

Bluecap-bottles with lids are charged as 1 unit.
